Self-Study Structure

A Working Committee, seven subcommittees, and an Institutional Planning Committee led Illinois Institute of Technology’s accreditation self-study.

Each subcommittee was charged with addressing and contributing to the discovery process of elements that not only directly responded to a specific criterion, but also blended across criteria.

The elements identified and represented as unique subcommittees were:

- Academic Preparedness and Engagement
- Student Life
- Technology
- Compliance
- Engagement and Service
- Financial Planning
- Communications

The Institutional Planning Committee consisted of the university’s academic and administrative leadership and provided oversight for and direct input to the self-study process.

In addition to the above committees composed of faculty, students, staff, and administration, the Trustee Institutional Planning Committee, with seven members of the university’s Board of Trustees, was an active participant in the process.

Finally, besides serving on a number of subcommittees, students participated in the process of revising the mission, vision and values, through direct meetings with President Lewis Collens. The list of student attendees is included at the end of this Appendix.
